Abbreviations: % = percentage; ppm = parts per million; NA = not available

Note 1: *saturated solution at room temperature; **by difference

Note 2: Since we are blending granular sea salts, results may slightly vary from batch to batch.

Note 3: "None Detected" means that ENC Labs' sensitive equipment couldn't detect this particular element.

The Equipment used and the elements tested have various threshold minimums, ranging from 0.001 ppm to 0.5 ppm.
